Presenting a General Address: Monday, June 26

COMMON GROUND: DYNAMICAL SYSTEMS THEORY

Consciously, or unconsciously we all use energy medicine and dynamical systems theory as the foundation of practice. Recognition of this common ground has the potential of bringing isolated, specialized fields of expertise together and revolutionizing health-care. When this happens the way we approach the treatment of diseases will be transformed. We will bridge the gap between all the various systems by forming a dynamic, global healthcare community.

and a full-day Post-Conference Workshop: Tuesday, June 27

THE BODY TALK ACCESS ONE-DAY TRAINING

The BodyTalk System is a well-established system of health care utilizing state-of-the-art energy medicine in a safe and comprehensive manner. Its power is based on increasing the levels of internal communication within the body—stimulating the body's own ability to regain and maintain a healthy balance. This work usually requires intensive training, however this workshop is intended to teach the complete BodyTalk Access system of five key techniques which can be applied in 10 minutes to improve a person's overall health balance and well being. It is our hope that Bodytalk Access will be able to provide a basic level of health maintenance in communities and countries around the world where good basic health care may not be available.
